GVCS Development Budget

[\$]

Designing	536,068
Prototyping	1,029,190
Field Testing	200,978
Documentation	414,581

Total	\$2,184,669
--------------	--------------------

1. Designing - research of existing technology as the conceptual foundation for prototyping.

2. Prototyping - three rounds of prototype development.

3. Field Testing - rigorous inspection of third prototype to determine the soundness of the design.

4. Documentation - creating materials to teach others how to build the machinery for themselves.

Price Comparison: GVCS vs Commercial Models
