Professional Experience

Open Source Ecology

2003-present

Founder and Executive Director

opensourceecology.org

Founded start-up non-profit Open Source Ecology (OSE). Founded on closed-loop manufacturing principles, leads the technical development of the Global Village Construction Set (GVCS)—an open source tool set of 50 industrial machines. Developed strategy, objectives, and goals to grow an open source economy that optimizes both production and distribution while providing environmental regeneration. Grew organization to multi-million dollar annual budget.
